Professional Summary

Aspiring AI/ML and Generative AI Engineer with hands-on experience in Python, SQL, Machine Learning, Deep Learning, NLP, LLMs, and Generative AI. Experienced in building AI-powered applications using LangChain, RAG, PyTorch, YOLO, and FastAPI, with practical knowledge of data preprocessing, exploratory data analysis (EDA), feature engineering, model development, and API integration. Strong foundation in Git and GitHub with a passion for solving real-world problems through intelligent and data-driven solutions. Seeking an entry-level opportunity in AI/ML, Generative AI, Data Science, or Software Engineering to contribute, learn, and grow as an AI professional.

Education

Master of Computer Applications (MCA)

Annamacharya Institute of Technology & Sciences (AITS), Rajampet
Jawaharlal Nehru Technological University Anantapur (JNTUA)
2025 | 78%

Bachelor of Science (B.Sc.) in Computer Science

Government Degree College, Rajampet
Yogi Vemana University, Kadapa
2023 | CGPA: 67%

Intermediate (CSE)

St. Joseph Junior College, Kadapa
Board of Intermediate Education, Andhra Pradesh
2020 | CGPA: 92%

Secondary School Certificate (SSC)

Government High School, Rajampet
Board of Secondary Education, Andhra Pradesh
2018 | CGPA: 77%

Skills

Languages: Python, SQL

ML/AI: Scikit-learn, XGBoost, TensorFlow, PyTorch, LSTM, MLflow, EDA, Feature Selection, Hyperparameter Tuning

NLP/LLMs: OpenAI, Gemini, Hugging Face, Transformers, Prompt Engineering, RAG, LangChain

Computer Vision: YOLOv8, OpenCV, Image Augmentation

Deployment: Streamlit, Flask, FastAPI, Docker (basic), Databricks

Cloud/APIs: AWS (basic), Gemini API, Serper API

Vector DBs: FAISS, ChromaDB, Pinecone

Other Tools: Jupyter, VS Code, GitHub, n8n

Projects

Context-Aware PDF Query System | RAG

Python | LangChain | Gemini API | ChromaDB | Streamlit

- Developed a Retrieval-Augmented Generation (RAG) system to answer user queries from large PDF documents.
- Implemented an end-to-end document processing pipeline including text extraction, chunking, embedding generation, vector storage, and semantic retrieval.
- Integrated an LLM to generate context-aware responses grounded in retrieved document content through an interactive Streamlit interface.

Vehicle Number Plate Detection

Python | YOLOv8 | OpenCV | EasyOCR

- Developed a real-time vehicle and license plate detection pipeline using YOLOv8 and OpenCV.
- Integrated EasyOCR to extract license plate text from detected plate regions.
- Optimized the detection workflow for varying lighting conditions and multiple vehicles viewing angles.

Voice-Controlled Search Assistant

Python | SpeechRecognition | Gemini API | PyAudio

- Built a voice-controlled desktop assistant capable of recognizing and processing spoken commands.
- Automated browser-based actions including opening Google, YouTube, and executing voice-based search queries.
- Integrated the Gemini API to generate natural-language responses to user questions.

AI-Powered Workflow Automation

n8n | Gemini API | Python | HTTP Requests

- Designed a multi-step AI workflow to extract website content, process documents, summarize PDFs, and automate notifications.
- Integrated Gemini API and HTTP-based services to enable AI-assisted information extraction and document summarization.
- Automated end-to-end information processing workflows to reduce repetitive manual tasks.

Certifications

- Applied AI & Machine Learning - Associate Readiness – (2026)
- Data Science – Naresh iTechnologies (2026)

Achievements

- Built multiple end-to-end projects across Machine Learning, NLP, MLOps, and Computer Vision.
- Developed and shared technical projects through GitHub and LinkedIn.
- Continuously improving skills in Generative AI, Agentic AI, Deep Learning, and MLOps.
